PROFESSIONAL SUMMARY

Software Engineer with 3+ years of production experience in enterprise mobile development (iOS), actively transitioning into Cloud Infrastructure and DevOps roles. Combines a strong foundation in software lifecycle management and CI/CD pipelines (Azure DevOps) with an academic background in Infrastructure as Code (Terraform, Ansible). Backed by hands-on training and practical labs in AWS and Terraform, offering a developer-first approach to cloud automation, secure deployment workflows, and scalable system architecture.

CORE TECHNICAL SKILLS

Ansible | Packer | Azure DevOps (CI/CD) | Linux Systems | Proxmox | Cisco Networking | Cybersecurity (CIS) | Git | SQL

PROFESSIONAL EXPERIENCE

Software Engineer / *ITSector* — **Mar 2023 – Present**

- Engineered, refactored, and optimized core modular features for high-traffic enterprise mobile banking applications (Millennium BCP and Millennium BIM).
- Maintained version control, peer code reviews, and managed build deliveries leveraging Azure DevOps CI/CD pipelines.
- Isolated and resolved complex native bugs and performance bottlenecks, reducing crash rates and improving stability.
- Collaborated within cross-functional agile engineering teams using Scrum workflows.

DevOps & Security Intern / *EuroTux* — **Aug 2022**

- Automated secure Golden Image generation using HashiCorp Packer workflows.
- Implemented CIS Benchmarks hardening policies across system images.

Software Development Intern / *ITSector* — **Jul 2022**

- Developed and tested target mobile application features using Swift and Objective-C in a Scrum team.

TECHNICAL TRAINING & HANDS-ON LABS

AWS Cloud Quest: Generative AI Practitioner Badge	May 2026
AWS Cloud Quest: Cloud Practitioner Badge	May 2026
Terraform Associate: Hands-On Labs	Jul 2025
AWS Cloud Practitioner Essentials	Sep 2025
Linux Essentials & Cybersecurity Suite	Cisco Academy
CCNAv7: Enterprise Networking, Security, and Automation	Cisco

INFRASTRUCTURE PROJECTS

Full-Stack Serverless E-commerce / *Personal Project*

- Provisioned a 100% serverless architecture on **AWS** using modularized **Terraform** to deploy both infrastructure and application code.
- Deployed a lightweight, responsive frontend (**HTML, CSS, JavaScript**) hosted on **S3** and globally distributed via **CloudFront**, with custom DNS mapping in **Route 53**.
- Engineered the backend API using **Python** running on **AWS Lambda** and **API Gateway**, integrating secure payment processing (Stripe) and a **DynamoDB** NoSQL database.

EDUCATION & ACADEMIC RESEARCH

MSc in Informatics / *University of Bragança (UPB)* — **2022 – 2025**

- **Thesis Focus:** Cloud Infrastructure & IaC Automation. Provisioned complex virtual training environments (CTFs) on a Proxmox cluster, achieving **100% automation coverage** via unified **Terraform** and **Ansible** playbooks to drop setup overhead down under 5 minutes.

BSc in Software Engineering / *University of Bragança (UPB)* — **2019 – 2022**

- **Final Project:** Designed a targeted Intrusion Detection System (IDS) layer focused on malicious SQL Injection mitigation.
- **Publication:** Co-authored a peer-reviewed scientific paper on security architecture insights published via *SciTePress*.
